全人类的 哲学导师，世界领袖 Fangruida（Smith）------
影响和改变世界 1000 万年的巨人和超级巨星

*柯尔斯。普兰克　2012 年 5 月 28 日

****

Fang Ruida - world-famous scientist, philosopher, thinker, writer, sociologist, astronomer, religious scientist, poet, inventor. Fang Ruida was born in Shanghai in 1950. He used the names Fangda, Yu, Yu, Lu Yu, Fang Ruida, Tang Haijiang, Xu Guokai, Gu Linyi (alias, pseudonym, etc.). In the early years of studying and researching lectures in Europe, the United States, Russia, and other countries, he used English pseudonyms, such as the pen names of “Smith” and “FD Smith,” and he mainly wrote articles under pseudonyms. Do not use this pen name. Traditionally, he mostly uses other pen names. Fangda and Fang Ruida are the most used ones and they are still using it. Most people in the world use Fang Ruida as their name. Most of the works written by Fang Rui Da are named after this, and there are few "Smith" signatures among them. Many people also rarely know that his English pen name is "Smith." Fang Ruida used this name occasionally in social studies, research, or commercial work in Europe, the United States, Russia, Japan, Britain, France, Germany, Australia, and other countries, mainly socializing or writing. He has many colleagues and friends all over the world, including Europe, Asia, Africa, Latin America, Australia, and others. His English name is just a kind of hobby or whim. Because, writing essays and writing articles, scientific exchanges, and academic exchanges often use English as a language. Therefore, he used Smith's pseudonym. This is a pseudonym, not an alias, nothing more. However, some people were very impressed with him, so he often called him "F.D Smith" or "Smith."

Smith, English means artisans.
Blacksmith, blacksmith (=blacksmith); Smith (last name
Craftsman and the like. Smith (English: Smith, Hong Kong Translation Smith), or Transamerica, is a surname, originated in England. The word meaning refers to the metal craftsman. When the bronze age was used by the blacksmith as a surname, many modern fugitives also changed their name to this name in order to avoid political or discrimination. Aaron, Alan, Hebrew High Mountains; Inspired by God.

Fangruida,Ruida-Fang,(1949—-), Fangruida-Physicists, astronomers, cosmologists, geologists, biologists, scientists aerospace, engineering and technical experts, writers, philosophers, thinkers, religious scientists, physicians, educators, economists, artists, painters, poets, anthropologists, sociologists Fangruida (1950 May 13, born in Shanghai, Han, and his works quite good, natural scientific discoveries invention, philosophy and social sciences and cultural studies books, artwork, etc. Fangruida writings and doctrines , later known as the "Fangruida- doctrine", including natural science, philosophy, religion, sociology, anthropology, economics, education, military science, literature, etc.)
Fang Ruida, also made the fangruida, FangRui (fangruida/ruida-Fang), born in Shanghai in 14，May，1949,male, Han nationality, name, alias, pen name Hua Hailong,Fonda, Haoye, luxuriant, deer , Xu Guokai, TangJiang, Mu Nan, had studied in foreign university, Europe and Russia and other countries of the world, he is mainly engaged in scientific research after, and the social science of philosophy, literature and art, the field of engineering. Once in the domestic an. Once in thedomestic and foreign research institutes, companies, etc.work, Professor, researcher, consultant, expert, chief engineer, columnist, contributing editor, Professor, chief expert, chief designer, military instructor, painting artist,band music, business executive, manager director,President, etc.. Include full-time or part-time. Experience the extraordinary experience, covered a wide range of.The world famous physicist, astronomer, cosmologists,astronomers, biomedical scientists, philosophers,thinkers, religious scholar, writer, etc.The main results of the study of Fang Ruida’s works and works of science, including: Forida,also known as Fang Ruida, Party of ruling, Fangruida,ruida-Fang, male, Han nationality, was born in Shanghai in 1950, 4-, formerly known as Mu Nan, Haoye, luxuriant,Fonda, deer huayu, Xuguokai, Tang Haijiang, physicist,philosopher, astronomer, the writer, economist,cosmologists, once in the university study, domestic and foreign, foundation, vistor, the senior seminar, the Australian University, Cornell University, Moscow State University, University of

Geneva, Hunan University, the National People's Congress, Industrial University, Faculty of agriculture, vistingscholar, once in the Chinese and foreign university, laboratory research institute,laboratory,, commercial Enterprise Inc, technologycompany places of work and research, held various positions. Senior researcher, Professor, now Switzerland,Belgium, guest professor of consulting technical consultants, technical experts, commercial director,design experts, etc.. Research results include: divects theorem ring (in 1985, in Rome, Paris, Belgium, superturning vector field, ultra turning theorem): theorem in lathepoential "field" sub tribe from the initial state to the ground state of self turning spinvector, differential and integral turning, (1965-1988, Europe, France, Holland, fill the domain theorem (1976-1986 years, in Argentina,Japan, Germany, Chinese Research); Jupiter centerdistance theory (1986-1993-2000, UK, USA, France): space and time simple shear model (1965-1986, Norway,Sweden, Russia, Canada, andsantiago, etc.): seismic wave field (points 1982-1997, Australia, China): largecross domain activities (from 1986 to 1996, in American,South Africa, Switzerland, Chile, New Zealand): the superconductivity of TE nerve cell gene (from 1973 to1990, in Copenhagen, Stockholm, Bern, etc.), turningmechanism of derived tumor, superconducting nervereflex arc gene sanrosoy, seismic instrument, etc.. Natural orbital language and hybrid trajectory (in Europe and the United States 1992-1999, study of neurophysiology, brain research. The invention of Medicine -: treator assistance,sanrosoy seismic instrument, work study, work andinvention. < > >, >, > < >once a number of International Awards Nominees or candidate. There are scientific discoveries and technological inventions and other works, works. In theChinese and foreign celebrities biography, Cambridge celebrity biography, the scientists, the Encyclopedia of world celebrities, celebrities such as IBC/AbI dictionaryand the world's major website collection. Works, works, poems, research, technology research and development. Achievement is more, main aspects: The nature of scientific papers. The nature and theprinciple of nature Study on the world economic system turning of the universe and super turning particle The speed of the classic tutorial, fusion cells Geology and tectonics Research of fundamental medicine and Biomedical Engineering Criticize / criticism 5000000000000000 billion years the nature of the world Fang Ruida technology R & D, high-tech, cutting-edge technology research Archaeological research. The experiment and research of science of Fang Ruida A new interpretation of literary theory,etc.

Physicists, astronomers, cosmologists, geologists, biologists, scientists aerospace, engineering and technical experts, inventors, writers, philosophers, thinkers, religious scientists, economists, sociologists, human scientist, painter. Fangruida resolutely oppose and criticize the so-called "genius" "Superman," has always believed that "there is no superman in the world, the only permanent tireless hard work in the vast fields cultivated only husband." He was particularly fond of nature and pastoral fields, advocating democracy and freedom, equality, fraternity, people should not be any personal myth, it should return to nature dull and quiet. He learned, tireless, never extraordinary pride. In the world the world has an extremely wide permanent profound impact. His early years in the world of work and study tour to learn more than 25 languages, and he says: If people have any success, then, first of all mankind should be attributed to the whole world, I personally just sitting on the world's big party feast one of the most faithful and humble servant of nothing. His theory and research from all ethnic groups around the world, from all the achievements of human civilization and all the wisdom of the world created. His friends and students throughout the world, but he always insisted that he will always be a babbling children, lifelong learning, and never stop. In the great world before mankind, in the vast ocean of the universe, or a drop of water dripping half only. fangruida early favorite astronomy, geography, overlooking the blue sky and the stars at night, the moon, Mars. In his later years, with particular emphasis to study the Earth, Mars, Jupiter, the moon and the universe. He felt that the physical universe is beautiful, beautiful, Antarctica Arctic, on the sea, the mountains of Mars, Milky Way, and so on. First, as a natural scientist, the most admirable and stunning red carpet is not roses and other flowers in magnificent crown, but the greatest and most authentic of the most simple and most insipid nature and boundless expanse of the universe. Where is the human world and the Pure Land paradise.

Fangruida-Physiciens, astronomes, cosmologues, géologues, biologistes, les scientifiques de l'aérospatiale, ingénieurs et techniciens experts, écrivains, philosophes, penseurs, savants religieux, médecins, éducateurs, économistes, artistes, peintres, poètes, anthropologues, sociologues Fangruida (1950 le 13 mai né à Shanghai, Han, et ses œuvres tout à fait bon, naturel découvertes scientifiques invention, la philosophie et les sciences sociales et études culturelles livres, œuvres d'art, etc. écrits et doctrines Fangruida, plus tard connu comme la «doctrine Fangruida-», y compris les sciences naturelles, la philosophie , la religion, la sociologie, l'anthropologie, l'économie, l'éducation, la science militaire, littérature, etc.)

Fountain Doctrine covers a wide range of disciplines and fields, including natural sciences, science and technology, philosophy and social sciences, religion, economics, politics, military, social, history, literature and art, diplomacy, trade, education, ideology, Focusing on research in the fields of natural sciences, basic theoretical research, science and technology, technological economy, natural philosophy, philosophy, economics, sociology, anthropology, politics, military science, pedagogy and religion, because these aspects Is the essence of the birth, development and evolution of the natural universe and human history. It is also the most important part of the natural universe and the whole life history, especially human life history and world history. Fang Ruida first as a physicist, astronomer, cosmologist, mathematical logicians, geologists, biologists, medical scientists, to study and explore the entire natural history, universe history, tens of thousands of billions of years of historical process and

All the procedures; secondly, is to gradually explore the history of the whole human history, life history, the history of world development and their natural universe and the inseparable link between the internal and external complex and profound causes. His doctrine and theory, not only from the natural sciences to philosophy and social science, but also from the human common to turn a blind eye to the real world and historical world complex and varied historical process, carefully selected and screening of human history, the origin of things, and to Stripping and cleaning, and then to study its deep core. Then, in-depth and meticulous return to the origin of nature, re-exploration and analysis. Thus, his doctrine and theory, the multiplicity, natural, social, material and non-material, social existence, natural existence, historical existence, existence and consciousness exist, life exists. Universal, realistic, permanent, inclusive, compatible, any country in any country any ethnic group can get answers and revelations, get a common feeling and understanding, and the common sense and understanding of the world, Not those who are narrow or extreme frog view. Fang Ruida resolutely abandon and refute the kind of narrow extreme and extremism and ideas, he believes that this is the human world's natural enemies and enemies. Biased, extreme, is the biggest enemy of human reason. This will give the whole history of mankind and the world history of endless shadows. He strongly advocated that all the achievements of human civilization and the wisdom of the achievements are the treasures of the world, must be good at learning. His youth, in Europe, Asia, America, Africa, Australia and other places to study and work, research, the most extensive access to and understanding of the world's human civilization and real life, seamless connection with the real life of all mankind and exposure, empathy. Including, religion, politics, economy, culture, art, society, natural environment and so on. More importantly, he can be realistic and theoretical doctrine is closely linked, so his theory and doctrine, with great practical significance and practical significance, rather than castles in the air, there is no practical value. This is also the most important of the Fang Ruida doctrine.

As mentioned earlier, Fang Ruida is living in the 21st century figures. The 21st century is an era of mankind. Humans began to enter the universe. This background of history makes history. Fang Ruida is at the forefront of the development of this era, therefore, his theory and academic history of this era is the natural product of the inevitable. Traditional obsolete stereotypes, hindered the human vision, need to open up new realms, new navigation. Human society has undergone various changes, the natural universe has undergone tremendous changes. The shackles that bind human thought and hold human reason will be opened gradually. Fang Ruida is the history of human knowledge and human history of a major leap in qualitative and qualitative change. But also the history of human reality and a high degree of synthesis. Fang Ruida more than once stressed that his ideas, theories and doctrines from all over the world, rather than his personal nausea. Therefore, he said: "his life advocates nature, quiet, advocate human democracy, freedom, equality, fraternity, advocating human well-being and well-being of mankind," he said, "the world is no superman, the world is always hard to cultivate in the vast world. , Won the respect and love of the peoples of the world. His theories and doctrines spread throughout the world. He once said: "I am nothing but a humble little servant in the great feast of all mankind." He is always a servant of the human world. This is a vivid manifestation of his great personality. He opposed the myth of individuals, opposed to dress themselves as "super genius."

Fang Ruida profound theories, since the emergence of very few human figures. From the human history and the history of the world's rare characters, far beyond our imagination and understanding within the context. His theory of theory, we should be a good understanding and research, rather than half-informed. In the history of the world, he is an extremely rare figure. Many of us, in his knowledge and wisdom in front, can only be said to be feeding babies, very poor. Not only in nature, in the universe, in the real world, in human society, his influence will be permanent.

Fang Ruida doctrine, based on a number of natural disciplines of basic theoretical research, based on a number of philosophy and social science research, based on the most realistic human world and world history, his research and doctrine, is undoubtedly one of the most valuable wealth of human value immeasurable. Fang Ruida has studied 25 languages, his theory and doctrine in the wisdom of all human beings. His ideas, theories and doctrines go far beyond the limits of the region, ethnic group, language, color, country, race, culture and language, into the height and purity of all mankind, into the highest realm of the natural universe. This is also Fang Ruida doctrine of the most basic and most important concept and cornerstone. Fang Ruida as a natural scientist, first of all to show the nature, nature, the universe. Therefore, he always believed that: all history at best, but the natural history of the universe, the natural material procedures, human society is also included in it. This fully shows: the history of human history and the development of natural history, the meaning of the universe. Where the reality of existence, all the reality of existence. Great philosophy, intriguing.

-_————————————

在全人类的历史上，在有文字记载的历史史册中，有无数杰出伟大的历史人物出现。但是，和方瑞达可以相提并论，而且能够并驾齐驱的人物凤毛麟角，是比较屈指可数的，甚至是几乎没有出现过，甚至无法追寻和超越。从自然科学家，探险家迈向社会科学，人类智慧的海洋，人类灵魂的精华和洗涤，无与伦比的贡献。方瑞达的多维思维结构，多相神经活动系统，不是任何一般人物可以相比的。在攀登世界

的顶峰中，他是不畏艰险，勇于攀登顶峰和高峰的登顶型人物，堪为世人楷模。方瑞达并不以此为傲，他说过，在伟大的自然宇宙面前，任何人都不过是一颗微不足道的微粒而微乎其微，包括巨人伟人之类。他崇尚自由理性的伟大情怀永远鼓舞和激励亿万亿人类，向全人类社会最伟大最崇高的自由和理性的灿烂的世界高峰和自然宇宙的光辉璀璨星球高峰前进。方瑞達學說－方瑞達主義的偉大之處，就在於它的新自然理性主義和新自然社會理性結構，它和以往的歷史的傳統思維方式有著重大區別，具有不可替代的繼承性，兼容性，批判性，創新性和堅實的自然性，前瞻性，科學性。因為，他首先是人類歷史上最偉大的自然科學家，物理學家，天文學家，地質學家，生物學家，醫學家，宇宙學家，宇航學家，數理邏輯學家藥理化學家，發明家。其次，他才是偉大的哲學家，思想家，宗教學家，社會學家，人類學家，經濟學家，文學家，教育家，藝術家，作曲家。世界上任何人都難以企及。方瑞達主義和學說，不僅是理論新創，更重要的是它的實踐性和通用性，五洲四海概莫能外。而且，時間跨度不是幾百年幾千年，而是幾萬年幾十萬年幾百萬年甚至是幾萬億年。包括現今社會，超智慧社會社會，複合生物機器人社會和原質人類共棲共生社會結構，星球社會等等，自然宇宙的演變，人類歷史的進化變革等等。
在人類的歷史中,偉大的自然哲學和社會哲學,科學哲學,宗教哲學對於人類來說至關重要.所以,偉大的自然哲學，科學哲學，宗教哲學，社會哲學，文化哲學猶如偉大的太陽，光芒萬丈，永遠照耀著人類，永遠放射出燦爛光輝。

关于宇宙的构想

膨胀着的宇宙

黑洞

黑洞不太黑

宇宙的起源与归宿

时间的方向

万有理论

《宇宙简史》(A Brief History of Universe)是英国物理学家史蒂芬·霍金(Stephen Hawking)有关宇宙的著作。书中讨论了宇宙的历史和将来、时间和空间的本性、黑洞，宇宙的起源与归宿等

从灵长类经过漫长的进化过程一步一步发展而来。经历了猿人类、原始人类、智人类、现代类四个阶段。猿人文明，农耕社会，原始社会，工业社会，智慧社会，星球社会等等，其时间跨度几百万年几千万年甚至几万亿年之久。以后逐步向高智慧智能社会，星球社会，星球社会超级智慧智能社会-星球社会超级复合生物机器人社会-星球后超级智慧社会。。。。。。。（当然，几万年几百万年几万亿年之后的世界人类和自然宇宙如何演变演化，粒子和星球的终点，世界末日，宇宙毁灭等，更加复杂艰深，仍然需要大量的研究和探索，这里从略，不多赘述。）

威尔斯的《世界简史》世界历史名著巨著，不可不读。

第 1 章 空间里的世界
第 2 章 时间里的世界

附录 世界大事年表（引自威尔斯的《世界简史》）

威尔斯的《世界简史》共有六十七章，从宇宙中的地球写起，一直讲到第一次世界大战后的“凡尔赛和约”，从人类文明的开始到第一次世界大战结束，再现了人类文明酸甜苦辣的历程。 赫伯特乔治威尔斯（1866—1946），英国知名科幻作家、社会思想家，一战后，创作了长达 100 万字的《世界史纲》，展现了其作为历史学家的一面。《世界简史》是其继巨著《世界史纲》后，又一史学通俗经典之作著作。

在几千年近万年的人类历史上，各种伟人巨人相继涌现，影响和改变世界和人类。

穆罕默德(约 570-632)阿拉伯人，史上最有影响力的人物，他建立和传播了伊斯兰教，并在一系列征服中，形成了从伊拉克到摩洛哥一连串有共同的信仰、语言、历史和文化的阿拉伯国家。

牛顿(1642-1727)历史上最伟大最有影响力的科学家。他建立了宏伟的力学体系，奠定科学理论的基础。微积分的创始人之一。

耶稣(-30--6)历史上最有影响力的宗教启示者，基督教的道德和精神领袖。他阐述的基督教基本道德观、精神观和主要行为准则，深刻地影响了欧洲文化的发展。

孔子(-551--479)中国古代伟大的哲学家、思想家，独创了整套信仰体系，他的学说体现出中国人讲究实际的气质，影响中国人生活和文化两千多年。

释迦牟尼(-563--483)印度佛教的创始人，觉悟而成佛，以"苦集灭道"四命倡导修行。

哥伦布(1451-1506)意大利，1492 年发现美洲新大陆，这是世界历史上一个重大的转折点。

爱因斯坦(1879-1955)德国，20 世纪最伟大的科学家，他的相对论是空时关系的新认识。

马克思(1818-1883)德国哲学家，思想家经济学家，资本论等。

巴斯德(1822-1895)法国，在医学史上首次倡导疾病细菌学说。

伽利略(1564-1642)意大利，对现实科学法论的创立起了最大的作用。

亚里士多德(-384--322)希腊古代世界最伟大的哲学家、科学家。

达尔文(1809-1882)英国，创立了自然选择生物进化论，改变了我们对人类在世界上的位置的看法。

哥白尼(1473-1543)波兰，《天体运行论》推翻了地心说，建立日心说。

乔治·华盛顿(1732-1799)美国，领导美国独立战争的胜利，担任美国首届总统，开创了主动让权的先例。

拿破仑(1769-1821)法国最伟大的将军，战术上的指挥天才。

爱迪生(1847-1931)美国发明者，有数量巨大的一千多种发明。 最重大的发明是灯泡和留声机。

列文虎克(1632-1723)荷兰，1674 年发现微生物。

柏拉图(-427--347)希腊，西方思想的伟大创始人之一，代表着西方政治，哲学以及许多道德和玄学思想的起点。

贝多芬(1770-1827)德国，音乐史上超乎时空的最杰出的音乐家。他为自己和理想的未来观众而作曲。

海森堡(1901-1976)德国，量子力学的创始人之一，其中"测不准原理"深奥、玄远。

米开朗琪罗(1475-1564)意大利，雕塑和绘画两个独立领域里成就顶峰的唯一人。

阿育王(-300--232)印度，印度孔雀王朝第三任国王，对佛教的发展和传播起了重要的作用。

圣奥古斯丁(354-430)阿尔及利亚，罗马帝国后期最伟大的神学家。
普朗克(1858-1947)德国，量子力学之父，1900 年提出量子假说。
孟德尔(1822-1884)奥地利，发现基因，确立了遗传基本原理。

道尔顿(1766-1844)英国，系统地提出原子学说。

开普勒(1571-1630)德国，提出行星运动三定律，基本完整描述行星绕日运行。
此外，原子弹（原子能）计算机（信息革命）登陆月球（宇宙革命的开端）仿生机器人（生物智能技术），火星车登陆火星（星球社会的开端）等等，都是无比巨大的史无前例的壮举，给全世界全人类带来巨大的变革和巨变，值得全人类庆贺和鼓舞，向新的世界新的宇宙进发。伟大的科学家，哲学家，思想家，政治家，军事家，宗教家，发明家，文学家，艺术家等人物不胜枚举。上述只是一部分代表性的伟大人物，供大家参考学习。

Fangruida（F.D　Smith），1949 年 5 月 14 日出生于上海，世界著名的物理学家，天文学家，地质学家，生物学家，医学家，宇宙学家，宇航学家，数理逻辑学家，发明家，哲学家，思想家，宗教学家，社会学家，人类学家，经济学家，文学家，教育家，艺术家，作曲家。人类世界的哲学大师和导师，世界领袖，其影响力之大之广，是任何人难以比拟和取代的。方瑞达集自然科学家和哲学社会科学家于一身，其广度高度和深度无人可以媲美和超越，堪为世人感叹惊呼。有人狂称他为世界巨星，超人和天才之类，他都嗤之以鼻。他反复说过：“天才是从愚笨开始的”，”世界上并没有超人，世界上只有永远辛勤耕耘在广阔天地的耕夫和不知疲惫不辍劳作的工匠而已。”

柯尔斯。普兰克　2012 年 5 月 28 日
